PROFESSIONAL SUMMARY

Frontend Developer with ~4 years of experience shipping production React.js and React Native applications for fintech and lending platforms. Deep expertise in multi-tenant architecture, real-time systems, offline-first mobile experiences, and regulated KYC integrations. Proven track record owning features end-to-end — from architecture through production release and monitoring.

WORK EXPERIENCE

Kosh (Fintech)

Frontend Developer · Full-Time

Gurugram, India

Nov. 2022 – Present

Web (React.js)

- Architected a multi-tenant React dashboard (4+ tenants) with hostname-based routing across Auth, Chat, CDP, LOS, LMS, and Payments services from a single codebase.
- Improved application load performance through lazy loading and code splitting across the multi-tenant dashboard, reducing initial bundle size and improving time-to-interactive.
- Built and evolved a real-time operations chat system using MQTT over Shared Worker, Firebase Cloud Messaging, and Indexed DB with offline-first sync, eliminating crosstab message loss and ensuring reliable collaboration across sessions.
- Shipped the core lending workspace (LOS/LMS) credit profiles, EMI/salary views, JWT-secured disbursal approval gates, and high-performance loan queue filtering — used daily by credit and operations teams.
- Owned end-to-end collections and repayment workflows and built a unified Customer 360 + CRM workspace, used by credit and recovery teams to manage borrower relationships.
- Mentored junior engineers on frontend architecture and coding best practices and conducted code reviews to uphold code quality and consistency across the team.

Mobile (React Native)

- Led development of a production React Native 0.84 app covering the full loan lifecycle (origination, KYC, approval, disbursal, EMI repayment), integrating Sentry, Crashlytics, and Amplitude to maintain a 99.5% crash-free session rate and track product usage.
- Implemented regulated KYC & compliance integrations — Digi Locker Aadhaar/PAN fetch, CKYC OTP verification, Account Aggregator consent flows — integrated with backend CDP/LOS systems.
- Managed production mobile release operations — CodePush OTA updates, white-label multi-tenant branding, and Play Store versioning — across 4+ lending brands.
- Scaled a customer-facing React Native app to 100k+ downloads and a 4.5-star Play Store rating through continuous performance and UX improvements.
- Enhanced Gifted-Chat with multimedia sharing, live location, URL previews, user mentions, and message pinning, driving a 50% increase in user engagement.

TECHNICAL SKILLS

- Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, Context API, TanStack Query, Tailwind CSS, HTML5/CSS3, Vite
- Mobile: React Native, Realm, MMKV, Firebase Cloud Messaging, Deep Linking, CodePush, Sentry, Crashlytics, Amplitude
- Backend & Data: REST APIs, GraphQL, JWT Auth, Role-based Access Control, MQTT, Python & Django (basics)
- Tools & Practices: Git/GitHub, Agile/Scrum, Code Reviews, Performance Optimization, AI-assisted development (Cursor, Claude Code)

DOMAIN EXPERTISE

- Lending / LOS / LMS Systems, DigiLocker, CKYC, Account Aggregator, Payment Links, Offline-first Architecture

EDUCATION

Maulana Mazharul Haque Arabic & Persian University

Bachelor of Computer Applications (BCA)

Score 77%

Patna, India

Graduated in 2022
